ABOUT US

SAI Geotechnical Engineers Pvt. Ltd. is a professionally managed organization comprising a Team of 15 seasoned technocrats, including Geotechnical Engineers, Geologists, and Hydrogeo-logists, Geophysicists, Surveyors, and Civil & Structural Engineers. Each department is headed by an expert in the respective domain, supported by a team of skilled and semi-skilled professionals, enabling us to deliver comprehensive services across these disciplines.

Our journey began in **2004** under the name **SAI Geotechnical & Construction Services**, And in **May 2009**, we rebranded as **SAI Geotechnical Engineers Pvt. Ltd.** To reflect our expanded capabilities and growth.

We are proudly empaneled with the **Ministry of Road Transport & Highways (MoRTH)** for Geotechnical Investigation works. Additionally, we are enlisted with the Consultancy Divisions Of **Delhi Metro Rail Corporation Ltd. (DMRC)**, **Maha Metro**, and **MP Metro**, contributing to Various Detailed Project Reports (DPRs) and geotechnical studies across infrastructure Projects.

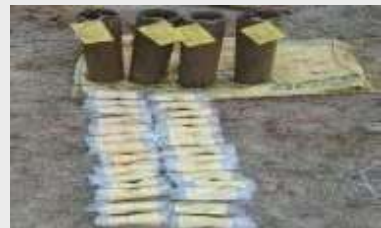

WHAT WE DO

We are Specialize in “Geotechnical Engineering” We do also various work as given below:

1. GEOTECHNICAL INVESTIGATION:

Geotechnical investigation, more commonly known as ‘SOIL INVESTIGATION’ and ‘ROCK INVESTIGATION’. It is required to obtain bearing capacity, engineering Parameters for designs of foundations for various kind of projects such as: --

- Highways project.
- Bridges for Roads/Railways.
- Railways Projects,
- Metro Rail Projects,
- Airport Projects,
- Residential Commercial, Office Buildings.
- Industrial Projects.
- Power Projects, Hydroelectric Power Project.
- Water Supply, STP/ETP and Pipelines.
- Refineries & Fertilizers Projects.
- Towers, Chimneys... And many more

2. TOPOGRAPHICAL & CONTOUR SURVEY:

We are conducting this survey by using latest and fool proof techniques and instruments like; Electronic Total-station equipment's, GPS and Auto-levels having following precision specifications:

Angle-measurement up to 0.1" of arch and distance up to 2.5 Km. To single prism to an accuracy of 2mm+2ppm recording automatically all measurement into GRE4 alphanumeric.

3. GEO-PHYSICAL INVESTIGATIONS:

These investigations required for foundation studied of any structures like dam, Power plants, high rise building, towers, and bridges, and underground structures etc. Further by Geophysical tests (Seismic refraction test, Cross hole/Downhole/Topography seismic) we can obtain bedrock quality & overburden thickness, Fracture, fault, weak Zone identifications, determination of dynamic properties of strata, seismic velocities.

4. PILE FOUNDATIONS

We are executing different types of pile foundations as mentioned below, which will

Require transmitting the heavy loads to sub soil strata in industrial projects, housing projects, power projects, highway projects etc.

Under reamed piles – this pile is basically developed for black cotton soil and used for light structures.

Bored Cast-in-Situ Piles – We are constructing this type of piles by direct mud circulation (DMC) met hod and up to 1200 mm Dia Piles. This pile is generally used for heavy structures.

5. Hydrographic Survey

Hydrographic investigations are required for obtaining the parameters of ground water and designing of tube wells.
